UPHOLSTERY: FRAME. SPRING. CUSHION. FABRIC.

There are many different options when it comes to upholstering your furniture. Making the decision between vinyl, leather, suede and other fabrics can be a difficult one. Not to mention the choices between colors and patterns, keeping with tradition or modernizing the look of your home.

Whatever you think you may want, partners from Furniture Heartland can assist you in choosing the right piece with the right look.

Upholstery is the work of providing furniture, especially seats, with padding, springs, webbing and fabric or leather covers.

UPHOLSTERY OF DOMESTIC FURNITURE

The materials which are important to the quality of an upholstered product, such as a bed, sofa, chair or ottoman, may be considered in four categories: the frame (usually wooden) on which the upholstery is to be constructed; the spring

system; the cushioning or padding; and the final fabric or leather covering.

CUSHIONS, PILLOWS, PADDING AND FILLS

Once a piece of upholstered furniture has its frame and springs, the next components to be added are the cushions and padding.

Most cushions are made of a high-density foam core that is then wrapped with either soft polyester, feather and down, or a hypoallergenic down substitute.

FABRIC AND LEATHERS

Textiles, a term used in the furniture industry, encompass both fabrics and leathers and the choice of textiles can account for up to 80 percent of furniture price. Tightly woven fabrics and blends tend to wear longer than light or loose-weave natural fibers.

Stop in and visit one of the stores featured, all found in Wayne and Holmes County's Amish Heartland.
